Introduction

Think English Elementary

is the first half of a 12 unit English course designed for adult learners from Myanmar. It is useful for Myanmar people who want to communicate in English including:

- People who work with English speakers
- University students who want to supplement their English studies
- Post-secondary students who want to improve their English
- Adult learners in education courses and programmes
- Teachers who want communicative teaching ideas for their classes
- Teachers who want locally relevant material to supplement a commercial English course
- People who travel abroad.

It is designed for adult and young adult students of English (around 16+). Some of the topics and functions are not appropriate for primary, middle or high school students.

Components of Think English

Think English consists of a Student's Book, a Teacher's Book and audio recordings for the listening activities. All these components and other additional material can also be downloaded from our websites: www.educasia.org and www.curriculumproject.org

1. Student's Book

The Student's Book 1-6 has 6 units, each with a structural, functional and skills focused syllabi.

Every unit includes a **Learning Strategies** section, where students look at ways they can improve their own language learning, and a **Practice** section covering language studied in that unit.

At the back of the book there are:

- a section of Pair-Work activities for Partner A and Partner B
- two **Revision** sections where students review the language covered in Units 1-3 and 4-6
- a Language Reference containing

- information about the main language and grammar points covered in each unit, a phonetic chart and a world map
- Audio Scripts

2. Teacher's Book

The Teacher's Book 1-6 contains detailed teaching instructions and answers to exercises. At appropriate points, **Language & Culture Notes** explain specific linguistic and cultural features of English-speaking countries, and **Extra Idea** boxes suggest activities for further practice. In addition, the Teacher's Book includes:

- advice on how to use the course most effectively: ways to adapt it to suit your class; ideas for extra practice exercises and activities; explanations of frequently-used terms; and suggested extra materials to supplement the course
- a Placement Test to check whether Think English Elementary is the right level for your students
- a Resources section with classroom activities you can photocopy or copy by hand
- three Progress Tests, one for every three units, to let you know how well students can understand and use the language and skills covered in the course
- a **CD** including audio recordings in MP3 format.

What's different about Think English?

Think English is written for Myanmar people and context. Most other commercially published courses are written for Europeans or Latin Americans who want to live or travel in the UK or North America. Teachers and learners in Myanmar, and throughout Asia, often find that the topics and functions in these materials have little in common with their lives, experiences and ambitions.

Think English focuses on the specific needs, context and learning environment of Myanmar learners, while also including a lot of world knowledge content.

Think English teaches mostly British English as this is more familiar to Myanmar students. However, we highlight potentially confusing differences between British English and other dialects such as American and Australian English. A wide variety of accents, both native and non-native, are used in the audio recordings.

A module for your context

Think English was developed to meet Myanmar people and classrooms' needs. It focuses on the language and skills that Myanmar people need to communicate effectively in English.

Think English has a world knowledge, social awareness and critical thinking focus. Topics include social, environmental and developmental issues. International settings are fully explained for teachers or students who are not familiar with Western cultural norms.

There is a little more emphasis on speaking and listening than reading and writing. Middle and high schools in Myanmar tend to focus on reading and writing, so students' speaking and listening skills are often weaker and require more practice.

There is more structural detail about the English language than you may find in most communicative textbooks, as Myanmar students (and teachers) are often interested in this. Teachers are not expected to be fluent in English and the Teacher's Book has clear, step-by-step instructions and explanations, without too much complicated language.

Learning tasks for classrooms are designed for low-resource settings. The only equipment that teachers need is a board, pens or chalk and an audio CD or cassette player. A few activities require text to be copied from the back of the book, but this can be done by hand if a photocopier is not available.

Think English is cheap to photocopy or print as there are no colour images inside. The student's material is all in one book (not separate classroom book and workbook) to reduce expense.

The course is longer than other elementary courses. Many Myanmar learners have few opportunities to practise English outside the classroom, so there are more opportunities to use the language within the course. For classes with less time, we provide guidance on what parts to skip.

At the end of each unit is a short, optional **Learning Strategies** section. This encourages students to reflect on their own language learning and suggests practical ways to improve.

Methodology

Learning a language requires both input (listening and reading) and output (speaking and writing). Vocabulary and grammar are part of these. Learners need to understand vocabulary and grammar when they listen and read, and use them when they speak and write.

Think English includes a lot of interaction activities, as many Myanmar learners get few opportunities for English language interaction outside class. During interaction they get both exposure to the new words and structures (reading and hearing them), and practice using them (speaking and writing). This makes it easier for them to learn the language.

Many Myanmar teachers are familiar with a more traditional approach to teaching English that focuses on grammar, translation and memorising. This is a communicative course, focusing on the skills and language needed for real-life communication. However, communicative activities are explained step-by-step for teachers without much experience of communicative classrooms, and there are opportunities to use more traditional learning methods where appropriate.

How do I use Think English Elementary?

1. Is it the right level for my students?

This is an elementary course. It starts at a high beginner level, and the final few units are at an early pre-intermediate level. If you are not sure whether students are at the right level to study this, give them the **Placement Test**.

If it is much too difficult, students should study a beginner course. If it is much too easy, students should study a pre-intermediate or higher course.

2. My students find this quite easy, but they are not ready to study a pre-intermediate course.

Before you start teaching a part of the book, you can give students the **Progress Test**, **Practice** section or **Review** section, to find out what they are good at and what they are not so good at. Then you can focus on the language and skills they most need to improve, and skip the rest. Teach it quickly. Skip activities that take a lot of time and sections covering language that your students already know well. Supplement the material in the book with more difficult material (see **Supplementary Resources**).

3. My students find this quite difficult, but they don't need an elementary course.

Teach it slowly. Explain points carefully, and give detailed feedback on common errors. As you teach, add extra exercises and activities, both in class and for homework.

Supplement the course with other materials. Use graded readers, vocabulary and grammar books, and other skills-focused material to help students understand and use the language they are looking at.

4. I have a mixed-level class. Some students are beginner, and some are pre-intermediate level. Most are elementary.

In the classroom, use pairwork. Pair a weak student with a strong one for some tasks, and pair stronger and weaker students together for other tasks. Give weaker students extra material providing simple practice of target structures and functions. Give stronger students extra, harder, material that builds on the target structures and functions to extend their knowledge.

5. I don't have a tape player / CD player / electricity / photocopier.

Most of the listening exercises are easy to make into reading exercises, using the **Audio Scripts**. You can read out the scripts yourself, or get students to read them to the rest of the class. There are only five activities that require copying text (see pages 156-160), and you can do it by hand if you don't have a copying machine.

6. How can I check that they are learning?As you are teaching, ask students questions using

As you are teaching, ask students questions using the functions and structures they have been studying (see point 3 above).

Observe students' performance of the activities in the book. See if they are mostly getting exercises correct, and are completing tasks without difficulty. Pay particular attention to how well they complete the **Practice** exercises at the end of each unit, and the **Revision** exercises after every three units.

Use the six **Progress Tests**. These test understanding and use of the language from Units 1/2, 3/4, 5/6, 7/8, 9/10 and 11/12.

7. I don't have much time in class. This course is too long.

Teach it quickly, skipping sections and exercises that are time-consuming, too easy, too hard or not very useful. Use the **Progress Tests** and **Practice** and **Revision** sections to decide what to focus on. Give lots of homework. Many parts of this course, e.g. most of the writing, **Practice** and **Revision** sections, can be done outside of class.

Extra activities and exercises

Vocabulary and Grammar Exercises

Below are some simple, adaptable exercises for use with vocabulary and grammar items, either in class or for homework. You can use them to check students' understanding of language, provide extra practice, and review points covered previously.

There are many more in **Activities for the Language Classroom**, available from our office and at www.educasia.org and www.curriculumproject.org

At the back of the book there is a **Language Reference** section, and at the end of each unit there is a page listing key vocabulary from the unit. You may like to use these to decide what language to put in the exercises.

1. Gap-fill

These are exercises where students write missing words in a sentence or paragraph.

2. I in a factory. 2. I bananas. 3. Ali and Ko Oo don't pork.
To make it easier and more controlled, give students clues, e.g.
My sister in a factory. (work)
To make it harder, have gaps where there are a lot of choices:
My sister in a factory. She like her job. She gets up at 5am every and takes a to the city. She home at 9pm. She always very tired.

This can focus on grammar and/or vocabulary.

2. Matching

These are exercises where students match questions and answers or sentence halves...

1. Cows don't eat meat
2. My parents doesn't eat meat
3. Ma Win don't eat meat

...or vocabulary with definitions:

1. big liquid that makes motors work

2. petrol to cook in water

3. boil large

3. Order the sentence

This exercise gives practice with sentence structure.

- 1. doesn't bicycle Daw Lay a have
- 2. Japanese speak don't I
- 3. chickens bedroom The sleep in my

4. Word snake

Prepare a list of words you want students to remember. Write them down without gaps or punctuation. Students have to find the words. Comfortablefryborrowpacketattendslowly

5. Substitution drill

Students practise using grammar structures. Write a sentence on the board using the target structure: I don't like swimming.

Students repeat. Write a word on the board (or say it), e.g. 'dogs'. Students say the new sentence: I don't like dogs

Continue providing new words, so students continue changing the sentence. You can change the target structure too:

eat I don't eat dogs

My mother My mother doesn't eat dogs

6. Correct the sentence

Students identify mistakes, and write correct sentences. This can focus on a grammar point...

- 1. My father does a teacher
- 2. I gets up at 6am
- ...or vocabulary items:
- 1. Gold is very cheap.
- 2. My niece is an intelligent boy.

7. Answer the question

Questions can be closed (few possible answers)...

- 1. Do you speak English?
- 2. Do tigers live in the sea?
- ...or open (many possible answers).
- 1. Do you think everyone should learn English?
- 2. Describe the best place for tigers to live.

8. Write the question

Students write the quest	ion t	o answers supplied.
1	_ ?	In Mandalay.
2	_?	Yes, she does.

9. Complete the sentence

J. CO.	inpresse sine series
Studer	its finish a sentence.
1.	I want
2.	My teacher doesn't go
Or prov	vide students with a list of words, and they
write a	sentence using them correctly.

Extra Class Activities

Here are some additional activities you can use in class to provide students with more speaking and listening practice. They can be adapted to focus on your target language point. The module **Activities for Language Classroom** explains most of these in more detail and includes many more useful activities.

1. Speaking stick

Think of some questions that use the language/vocabulary you want to review, check or practise. Pass a stick (or pen) to a student at the front of the class, and ask a question. If the student answers the question correctly, give them the stick. Then that student asks the same question to the student next to them, who answers and takes the stick. While that stick is going around the class, get another stick, and ask the first student a different question. Eventually, there should be several sticks going around the class, with students asking and answering different questions.

2. Whispers

Think of a sentence that uses the language you want to review, check or practise.

Divide students into two teams, who stand in lines. Write the sentence on a piece of paper. The first person in each group reads the sentence silently. They whisper it to the next person in their group, who whispers it to the third person, and so on. The last person in each group writes the sentence they hear on the board. Is it the same as the one you wrote?

3. Race to write

Think of a list of questions that use the language you want to review, check or practise.

Divide the class into two teams. Get one member of each team to come to the board, and give

them a board pen or piece of chalk each. Ask the first question (loudly). The two team members write the answer on the board. The first one to write the correct answer gets a point for their team. Then the next two team members get a question, and so on.

4. Matching sentence halves

Write a list of sentences that use the language you want to review, check or practise. Cut them in half. Give each student half a sentence. They walk around the class saying their half-sentence until they find the student with the other half. They then come to you to check if they are correct. You can also use questions and answers for this activity. You can make it more difficult by getting students to memorise their sentence half or question or answer, and then give the paper back to you. Then they have to go around the class saying it from memory.

5. Backs to the board

Think of a list of words or phrases you want to review, check or practise. Divide the class into two teams. The teams face the board. One member of each team stands with their backs to the board (facing their teams). Write a word (or phrase) on the board, so that everyone except for the two team members can read it. The teams have to communicate the word to the member without saying the word. They can explain or define it, or they can mime or act it, but they are not allowed to say the word (or a translation). The first team member to correctly guess the word gets a point for their team.

6. Disappearing paragraph

Think of a paragraph of around 3-6 sentences that uses the language you want to review, check or practise. This could be from a text the students have just studied. Write the paragraph clearly on the board, so that all students can see it. Students read it out loud together. Erase about 10% of the words. Students read it out loud again, saying the missing words from memory. Erase another 10% of the words. Students read it again. Continue erasing, bit by bit, until students are reciting the entire paragraph from memory.

7. Pair dictation

Write two paragraphs using the language you want to review, check or practise. They could be taken from a text they have just studied. Make enough copies of each paragraph for half the class. Students work in pairs. Partner A reads the first paragraph to Partner B, who writes it. Then Partner B reads the second paragraph to Partner A, who writes it. When they have finished, they check the original paragraphs and correct any mistakes.

8. Quiz

Divide students into groups of four to six. Give them ten minutes to think of five questions using language they need to practise. Groups must think of questions which have clear, factual answers – no opinion questions. Groups read their questions, and other groups try to answer. The first group to get an answer right gets a point. When all the questions have been asked, count the scores. Which group won?

Some terms used in the Teacher's Book

Here are a few terms that are used a lot in this Teacher's Book:

Elicit means to get students to provide answers, opinions or ideas (instead of the teacher giving these to the students).

Pre-teach means to introduce new vocabulary before students read or listen to a new text. You can do this by providing background information, translation, or eliciting definitions from the students.

Demonstrate means to perform a new task in front of the class before getting students to do it. This way, students have a model to base their tasks on – they can see what they are supposed to do.

Prompt questions are used to encourage students to speak. Sometimes students are not sure of the right thing to say, and prompt questions help them.

Brainstorm is similar to elicit. Students think of as much as possible about a topic, or as many examples as possible of something, or a list of items. You can do this as a class, writing students' ideas on the board as they say them. Alternatively, put students into groups, and encourage groups to compete to list the most points or items.

Drills give students practice at saying key words or structures. In the simplest drills you speak and the students speak after you. In other drills you can write words or a sentence structure on the board each time, with the students repeating it aloud.

Using students' first language (L1)

Sometimes you might need to use L1 to:

- give detailed instructions
- clarify and check understanding of key ideas or language
- discuss complex ideas

However, as the objective is for students to improve their language skills, English should be used in the classroom as much as possible. It is best if you try to explain something in English first, and only use L1 if the meaning is still not clear.

In group and pairwork activities, students should normally use English. For some activities, the teacher's instructions in this book tell you to make sure students use only English. For a few activities, where the ideas are more important than the language practice, we have suggested that students use L1.

Supplementary resources

Think English provides broad, general coverage of elementary level grammar, vocabulary, pronunciation and skills. If your students want extra practice in one of these areas, there are other resources available.

Graded readers are books written in simplified English. Some are original stories, and others are easy versions of famous stories. Students will enjoy reading in English, and learn faster, if they can understand most of it. At the elementary level most newspapers, magazines and books in English are much too difficult.

Reading and Writing 1 & 2 are short guides to describing people and pictures. Encouraging students to read and write as much as possible will improve their English vocabulary and understanding, as well as their general knowledge. It is available from our offices and at www. educasia.org and www.curriculumproject.org

There are available books that focus on specific **skills** such as reading, writing, speaking, pronunciation or listening. There are also books targeting **grammar** and **vocabulary**.

The **internet** has many useful English learning resources, from easy news items to pronunciation practice. See www.educasia.org and www. curriculumproject.org for links to some of these sites.

Local and international radio stations often have English language learning programmes.

Teachers' resource books contain information about teaching techniques and/or activities you can use in the classroom. Some are practical in focus, while others are more theoretical.

We value your feedback. Please let us know if you have any corrections, comments or suggestions for improvements that can be made in the next edition.

Think English Elementary Placement Test

Use the test on the following pages to help you decide if your students are at the right level for this course. Give one copy of the test and one answer sheet to each student. Tell them to only write on the answer sheet, not on the test. (This makes it easier to mark, and allows you to re-use the test papers.) They have one hour to complete the test. If you think that the students are not used to this type of test, you might want to translate or explain the instructions.

- Students who get less than 29 points will probably find the course too difficult. They are advised to take a beginner course.
- Students who get between **30 and 80 points** should find the course about the right level.
- between 30 and 54 points should take Think English Elementary 1 to 6
- between **55 and 89 points** should take Think English Elementary 7 to 12
- Students who get more than 90 points will probably find the course too easy. They are advised to take a pre-intermediate course

Note that this placement test should not be used alone and needs to be supplemented by the teacher's own judgment.

An ethnic group is usually defined by things like shared traditions, language, culture and ancestry, but there are many definitions and it is sometimes not clear who belongs to which group.

Nationality can mean being a citizen of a country or a member of an ethnic group. Ethnicity only refers to membership of an ethnic group.

Race usually only refers to common physical characteristics of a group of people, such as skin colour, hair type and nose shape, which results from having shared ancestors.

If you have enough time and space, write the text on the board. Get a few students to write adjectives in the gaps until the text is complete. Elicit alternatives for the ones they write. Do Disappearing Paragraph with the text on the board. Students read out the text. Erase 15% of the words. Students read the whole text out, including the missing words, from memory. Erase another 15% – students read it out. Keep doing this until the text is completely erased, and students are saying it from memory.

Pre-teach 'living room', 'kitchen', 'bedroom' and 'bathroom'. Do a group brainstorm. In groups of four to six, students make lists of furniture you can find in a living room, kitchen, bedroom and bathroom. Many things can be in more than one room.

Make class lists on the board. Make sure these are included: desk, table, stove, sink, toilet, sofa, chairs, television, fridge, bed, bookshelf, drawers, cupboard, lamp, mirror, mat. Establish the situation – Jessica is moving to a new apartment. Khin Zaw and his friend are helping her move her furniture. Play audio (064). Students identify which room the furniture goes in. Answer:
